EXPERIENCE

◆ FULL-STACK DEVELOPER

Aug 2022 - Present | Caseware Africa, a Division of AdaptIT

- Developing Auditing and Accounting applications, built into a client-specific portal. Utilizing pre-existing Javascript form-builders, and modifying this to a great extent in order to satisfy clients. Custom styling is also applied in order to satisfy clients.
- Implementing Safe framework to collaborate with large teams spread over the world in order to become as Agile as possible.

◆ FULL-STACK DEVELOPER

Oct 2021 - Aug 2022 | ThinkTank Creative

- Developed file security system with authentication for administrative users.
- Developed complete Laravel CRUD systems with modular forms and calendar data systems.

◆ FULL-STACK DEVELOPER

Sep 2021 - Feb 2022 | SMART Media Masters

- Developed Greensock animated landing pages with custom CSS modules and converted entire website to server side-rendering for SEO and performance purposes.
- Developed blog API's with Laravel Lumen, fetched and handled with React Js.

◆ FULL-STACK DEVELOPER

Feb 2021 - Feb 2022 | Intelligent Machine Incorporated

- Developed multiple plugins using MySQL, PHP.
- Created secure intranets with multiple features like user-roles, dynamic user management and mail verification.
- Using Google form iFrame and converted code to create a static html with dynamic styling using PHP and Javascript.

◆ FRONT END DEVELOPER

Mar 2020 - Nov 2020 | Site By Design

- Designed WordPress Websites for small-sized businesses using Elementor and Gutenberg page builder.
- Developed PHP plugin login and registration system with dashboards.
